Sustainability leads the way

Ivo Maltir
President

"Countries, Citizens & Companies have a shared responsibility towards Sustainability. **As we want to be a responsible player, we take our Corporate Social Responsibilty seriously, guided by the Sustainable Development Goals** (SDGs) from the United Nations.

We strive to conduct **our business in an ethical, environmental, and humane manner.** All SDGs goals are important to work on, and the climate change is a top priority, **engaging the world in a race to reduce global warming.**

Therefore, one of our major target is to significantly **reduce our CO_2 emissions by 2030** (-46% on Scope 1 and 2, -28% on Scope 3)*.

Together with our customers, employees and suppliers, we aim to support the industry's transition.

Sustainability is at the core of our approach and influences our decisions at every level."

*Group targets

Desoutter is committed to building a more sustainable industry

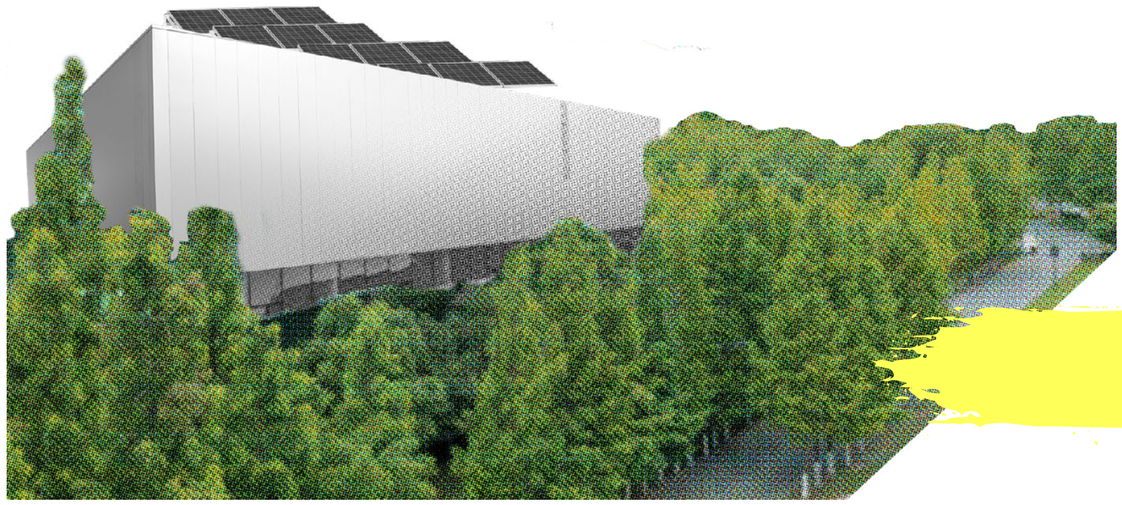

"The transition to a low-carbon society is accelerating the transformation of the entire industry.

Therefore, we will continue to strongly invest in innovation to offer our customers Desoutter expertise, solutions and services.

With an ethical and inclusive culture, a safe and healthy workplace, and passionate people, we aim to align our actions with our values."

Yohan Verdon
Desoutter Vice-President

Desoutter

SHAPING THE FUTURE

- Driving the **technology evolution**
- Contributing to create a **low-carbon society**

CREATING A BETTER TOMORROW

- Challenge the way we do things to find a **more sustainable way**
- Partnering with our customers to contribute to **the development of a low-carbon industry**

MAKING A DIFFERENCE TODAY

- Continuously invest in R&D to develop **low-emission products**
- Contributing to existing **low-carbon technologies**

Evaluation of our sustainability performance**

To evaluate our activities and demonstrate our commitment to sustainability, we rely on external Environmental, Social and Governance (ESG) assessment platforms, such as **EcoVadis.** Those platforms enable us to challenge our targets and the way we do things.

They are increasingly demanding, which drives us to seek for continuous improvement.

CO_2 reduction

We take our environmental responsibility seriously.

In 2021, we realized our company carbon footprint and have set ambitious CO_2 reduction targets by 2030 (baseline 2019).

Our sites are operating with a focus on reducing their carbon footprint**

83%
of our facilities use renewable electricity.

+10%
is the target of increasing non fossil vehicle in our car fleet each year.

100%
of gas consumption from biomass.

49,4 tonnes
of CO_2 saved since January 2023 as a result of France soft mobility policy.

*Group targets
**Divisional Headquarter

Targets Scope 3*

-28%
by 2030

Most of our CO_2 emissions comes from **Scope 3 Downstream,** when our products are **in-use phase.**

The 3 major levers our R&D teams are working on to reach our targets are:

- **Electric-powered products**
- **Energy-efficient products during usage**
- **Customer usage optimization**

Since January 2021, the CO_2 impact of any new product is measured through a **Product Carbon Footprint (PCF)** based on ISO 14067:2018 standard.

This measure enabling us to improve tool efficiency along with product development process and provide product recommendations to our customers.

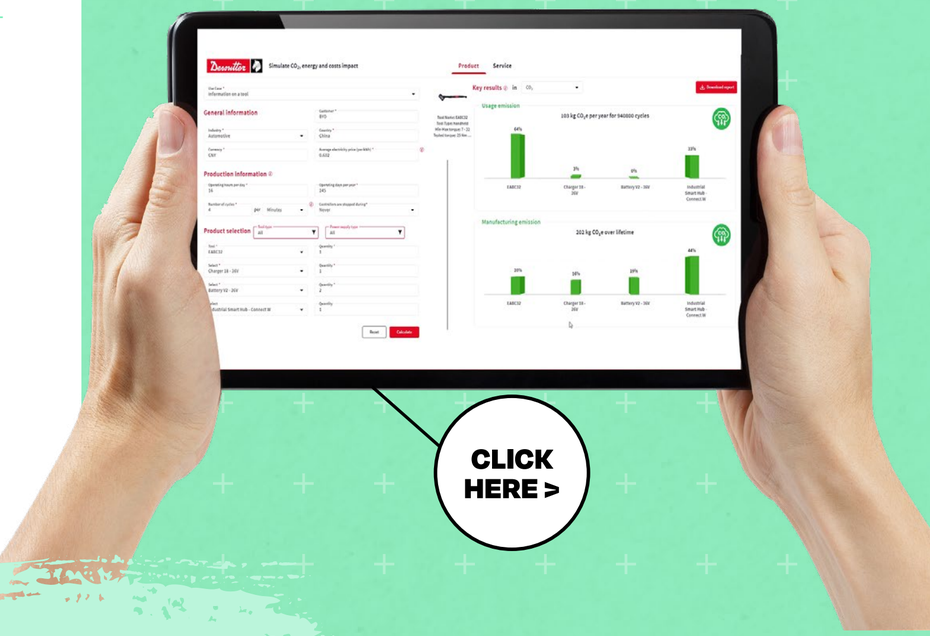

We support our **customers to reduce their own carbon dioxide emissions** by developing efficient solutions.

*Group targets

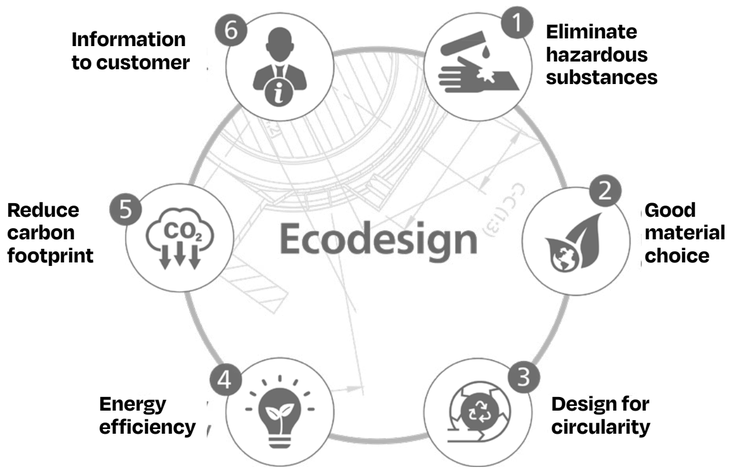

Circularity

Focusing on Circularity is also a way to support Sustainability. We are running several initiatives **enabling product offer to our customers while preserving resources.**

Rethink. Redesign.

In 2023, all engineers in our R&D team have been **trained on Eco-design,** and **Eco-design guidelines** have been launched.

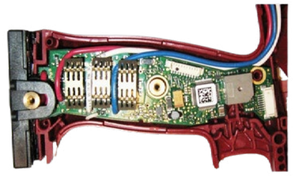

Additionnally, the **Environmental Checklist** has been reviewed to challenge environmental impact and develop circularity along new product development.

Repair. Remanufacture.

Desoutter products are shipped with a spare part list to enable and encourage reparability.

In 2022, Desoutter Service started **refurbishing Printed Circuit Boards.**

When an E-Lit PCB needs to be replaced, we propose our customers to choose either a brand-new part or a certified refurbished one.

The obvious benefit is a reduced maintenance cost, always with a high level of quality, 3 months warranty and an immediate availability of the part.

By refurbishing broken PCB's, we save 6,3kg* CO_2e per E-Lit Printed Circuit Board.

The next step is to expand this to other spare parts.

* After deduction of the energy and the refurbishing components required.

Packaging

In 2023, we challenged our Desoutter product packaging.

The outer carton used to have a white treatment and many red logos printed.

We decided to use as of now **a minimalist approach using only black ink on raw cardboard,** while also reducing waste from box production thanks to the FEFCO 0471, requiring fewer die-cuts.

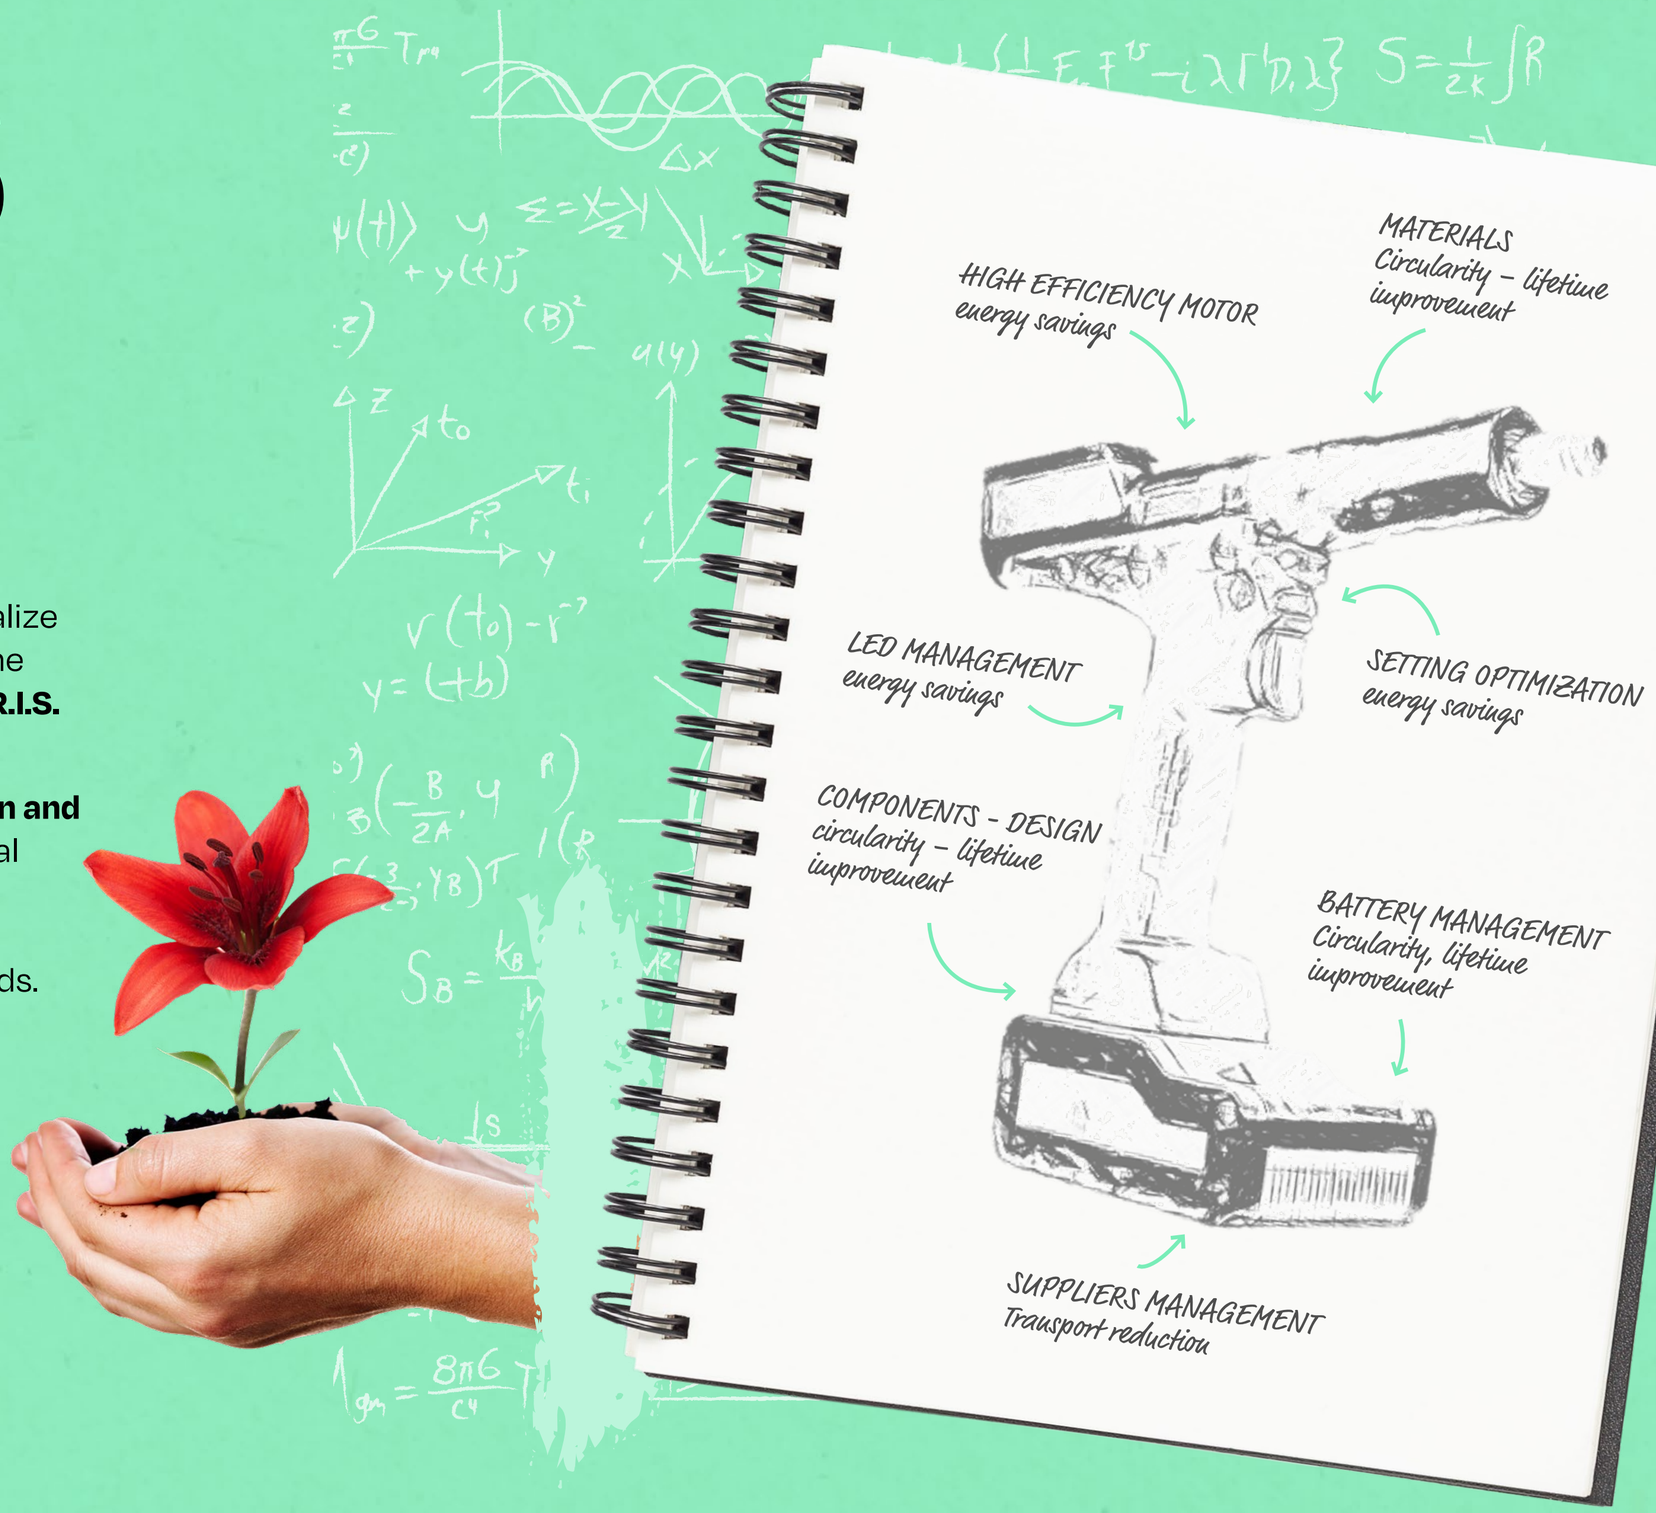

I.R.I.S

Innovation and
Research
Initiatives for
Sustainability

To go further on environmental improvements and to ensure we capitalize our knowledge and improvements in the future, we decided in 2023 to create **I.R.I.S.**

I.R.I.S is an internal Desoutter program dedicated to investigate **"CO_2 reduction and Circularity" topics,** trends, and potential improvements, designing solutions to enhance the performance of our products and meet customers needs.

I.R.I.S is mainly led by our Advanced Research and Development team ; each year 2 projects are investigated.

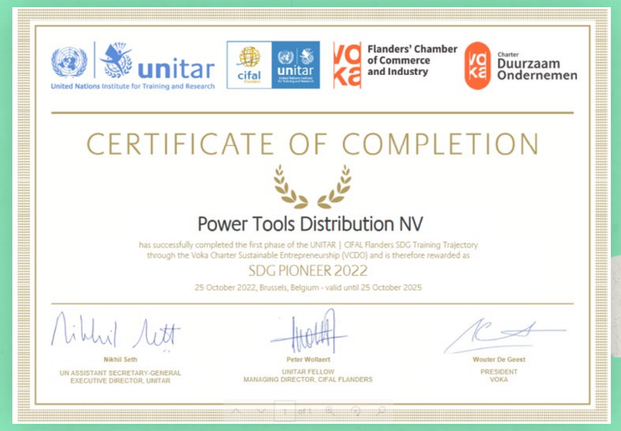

EXPLORE INNOVATIVE IDEAS

Logistics

Limit our Footprint impact in Logistics

Our logistics platform in Belgium has been recognized as a **Sustainable Development Goals pioneer** in 2022 thanks to:

- **Energy consumption reduction:** -50% compared to 2019.
- **Packaging initiatives:** using recycled paper for box-filling and reusing incoming packing material.
- Plastic replaced by **recycled plastic or paper.**
- **Carton pallets used** instead of wooden pallets, mostly for air shipments.

CERTIFICATE OF COMPLETION

Power Tools Distribution NV

has successfully completed the first phase of the UNITAR | CIFAL Flanders SDG Training Trajectory through the Voka Charter Sustainable Entrepreneurship (VCDO) and is therefore rewarded as

SDG PIONEER 2022

Diversity & Inclusion

Employee Engagement & Feedback

Local Community Involvement

Safety

Well-being

Talents & Skills

We promote **accelerated and self-driven learning** to ensure the right competence and mindset to drive transformation and enable growth.

"Continuously building knowledge and enabling employee growth through dedicated learning journeys is key to us remaining innovative in our approach. This is achieved through dedicated learning platforms, global specialist, leadership, business or expert development programmes and themed playlists in addition to extensive technical offerings".

Diversity & Inclusion

An inclusive culture is one of **the pillars which drives the success of our organization.**

"We are committed to fostering an attractive and inclusive environment throughout, through attracting and retaining a diverse talent pool, developing mentorship programs, raising awareness of unconscious biases, promoting mental and physical well-being and belonging".

Julie Lambert-Scrivener
VP Human Resources

30%
of our workforce is expected to be women by 2030*.

85
functions working together as one Desoutter team**.

35
different nationalities collaborating together globally**.

*Group targets
**Divisional Headquarter

Employee Engagement & Feedback

On a regular basis, our employees are given the opportunity to take part in **our employee engagement survey**, internally called "Insight Survey".

This enables our organization to receive **valuable feedback and drive continuous improvement** through measuring employee satisfaction against key indexes such as **Engagement, Culture, Diversity & Inclusion, Leadership, and Cultural Behaviours.**

Local Community Involvement

All our local teams are involved with community events, from fund raisers, to sponsored sporting events, donations to local charities and working with local schools and universities.

Action against World Hunger

October 2025 - USA
Breast Cancer Sponsored Walk →

Safety

We care about Safety.
To ensure a safe workplace, all employees and newcomers need to complete our Safety, Health, Environment and Quality (SHEQ) training.
To achieve our goals, we conduct a **mandatory SHEQ training for all newcomers** in our divisional headquarter.

"We are committed to preventing pollution, limiting our impact on our environment and providing a safe and healthy working place for all employees.

We integrate SHEQ aspects at all stages of management. Our vision is zero work-related accidents."

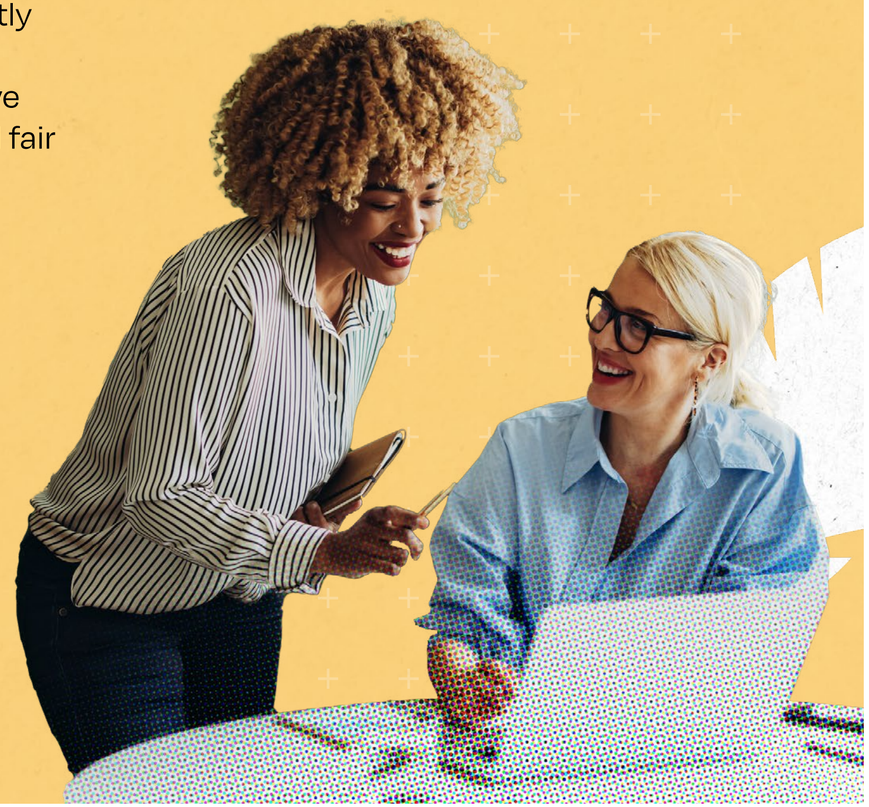

Franck Guedeu
SHEQ Manager

Well-being

In our organization, we define well-being as being in a **sustainable state of feeling good and functioning well** in our lives and in our work. Achieving this requires a sense of well-being physically, mentally, socially, and purposefully.

Supporting well-being is critical to our organization's success. We are constantly striving to **create a culture** in which our employees are able to thrive and achieve their potential in a supportive, open and fair environment.

Our guiding framework will help us achieve our People & Culture Mission to be an attractive industrial company in our segments and target markets by **supporting our people to realize their potential, cope with the everyday stresses of life, and work productively.**

Ethics & transparency

Code of Conduct

Governance

ISO Certifications

Responsible Procurement

Trade Compliance

Code of Conduct

We firmly believe in upholding **high ethical standards** at every level of our organization.

We have made the **Code of Conduct** mandatory for **not only our employees but also our suppliers and customers.**

By adhering to these principles, we promote a responsible and sustainable business environment.

100%

of our employees signed the Code of Conduct in 2025**.

Target 2026*: 100%

*Group targets
**Divisional Headquarter

Governance

To act with transparency and full alignment towards our commitment to sustainability, we have established a dedicated governance structure, and created in 2021 a **Sustainability Steering Committee.**

Led by our Sustainability Manager and overseen by the President and Vice Presidents, this committee meets every 2 months and ensures that sustainability decisions are consistent and implemented.

These meetings serves as a platform for monitoring and making decisions pertaining to sustainable development initiatives. It also fosters contributions to our overall organizational performance in terms of sustainability.

Responsible procurement

We expect our suppliers to have ESG standards. In this context, we have implemented specific actions** **to support suppliers** in this engagement:

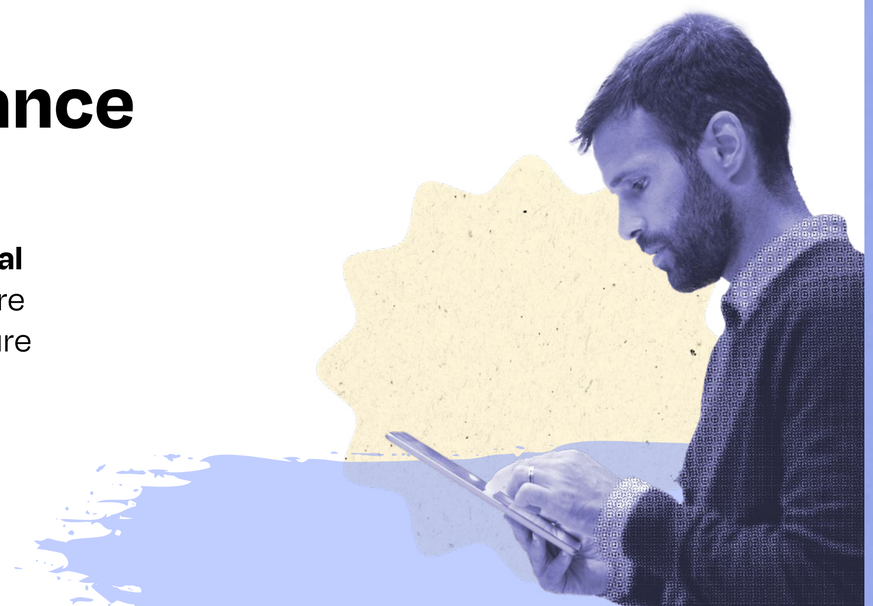

- In 2023, we started to evaluate our **top 20 suppliers** with a simple questionnaire.
- In 2024, we signed a contract with ecovadis to evaluate our suppliers on their ESG performance. Currently, 34% have been evaluated and 2027 target is 75%.
- **Dedicated teams are focusing on increasing the use of recycled material** in our products in order to develop Circularity.

Olivier Dalicieux
VP Operations

Trade compliance

As a responsible partner we also take **international trade regulations** very seriously. We have therefore created a specific organization to verify and secure our compliance to international regulations on all trades with our business partners.

**Divisional Headquarter

Our triple ISO certification

Our Integrated Management System** is conform to three ISO certifications:

ISO 9001:2015
Quality Management System standard.

ISO 45001:2018
Occupational Health and Safety Management System standard.

ISO 14001:2015
Environmental Management System standard.
